

Hilti TE 76 Combi Hammer

The rules and procedures in force where people are at work may require the person responsible for this equipment to carry out a specific risk assessment.

ELECTRICAL SAFETY

The machine will only operate on one voltage. This will be 110v or 230v, 110v machines will have a yellow industrial plug fitted, 230v machines will have either a normal square pin plug fitted or a blue industrial plug. Read the instructions below for the machine.

110 VOLT MACHINES (YELLOW PLUG)

1. If using a portable transformer, plug the transformer directly into the 230 volt socket. Do not use any 230v extension cables.
2. If an extension cable is required, follow any special instructions given by the hire company. If the hire company has not given any special instructions, only use a suitably rated heavy duty 110v extension cable, not longer than 50 metres (160 feet). Only use an extension cable between the transformer and the machine.
3. Lay the extension cable out carefully avoiding liquids, sharp edges, doorways or windows where it might be trapped and places where vehicles might run over it. Unroll the cable fully or it may overheat and catch fire.
4. Ensure any extension cable connections are kept dry and safe.

Keep this leaflet in a safe place until work is finished as it may need to be referred to again.

Read this entire leaflet before using the Hilti TE 76 heavy duty combi-hammer

1. Plan your work and think ahead to make sure you will always be working safely.
2. Electricity can be hazardous and must always be used with great care.
3. This machine produces high vibration while in operation.
4. The Hilti combi-hammer is designed for hammer drilling, including core drilling in concrete, brickwork or natural stone. For conventional drilling in wood and metal switch off the hammer action and for light chiseling of masonry switch off the rotary action. Each different task will require the appropriate bit or chisel.
5. This is a heavy powerful two-handed tool, it may cause injury to persons or damage to property if it is not handled and used carefully and properly.
6. If you have not used the Hilti TE 76 before, familiarize yourself with the machine on some straightforward work before starting on the main task.
7. The following items of personal protective equipment are the minimum required: impact resistant goggles; dust mask – a minimum of FFP3(s) protection; ear muffs or plugs giving protection for levels up to 100 dB(a); gloves; rcd if using a 230 volt (mains) supply.
8. This tool must not be used by minors, or by anyone under the influence of drugs or alcohol.
9. This equipment is designed for operation by an able bodied adult. Anyone with either a temporary or permanent disability must seek expert advice before using the equipment.
