OUR SERVICES

TESTING & INSPECTION

Our engineers can inspect your lifting equipment in accordance with the Lifting Operations and Lifting Equipment Regulations (LOLER) 1998.

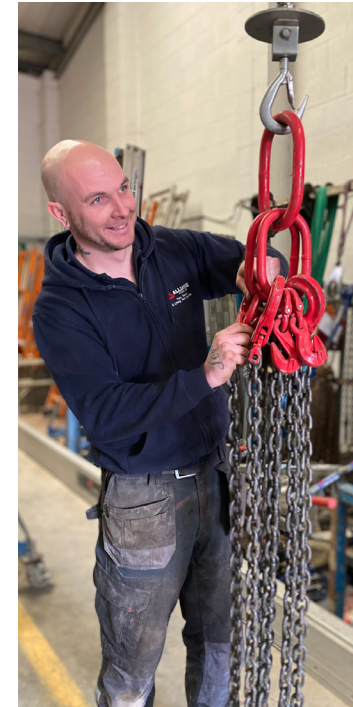

Services

- > On site equipment testing *on site or at our depots*
- > Load testing
- > Equipment installation
- > Site surveys

TRAINING & FAMILIARISATION

We can train your staff to competently use lifting equipment.

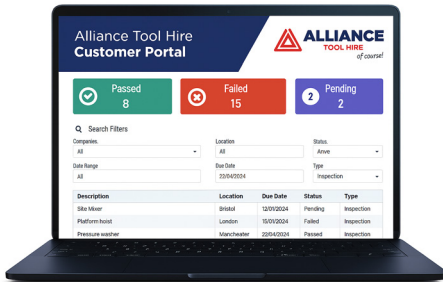

To support safe lifting practices on your sites, we offer flexible training services for your team:

- **Equipment familiarisation:** How to install and operate lifting equipment for proper and safe use
- **Delivered at your site** or one of our depots
- **Tailored sessions** available for specialist applications

Get in touch to find out how our team can help increase confidence and reduce lifting risks:

E: lifting@alliancetoolhire.com

Customer portal

- > Instant access to LOLER certificates and defect reports
- > Full asset history
- > Re-test reminders
- > Colour, RFID and QR tagging options

REPAIRS & MAINTENANCE

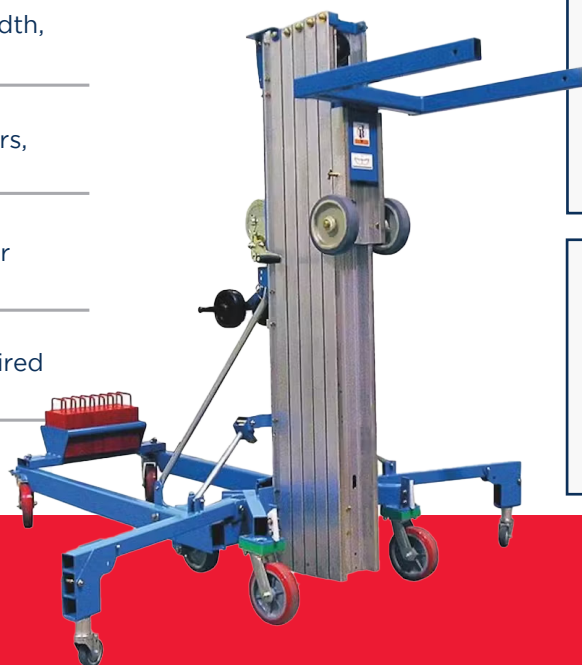

We offer high quality repair services for a full range of lifting equipment with fast turnaround time.

Pre-Hire Checklist

To help you select the right lifting gear, we recommend reviewing the following questions before placing an order:

- 1 **LOAD WEIGHT AND LOAD CENTRE**
What is the maximum weight to be lifted?
What is the correct load centre?
- 2 **HEIGHT OF LIFT**
What is the correct height of lift?
- 3 **SUSPENSION POINT**
Do you have an adequate and safe suspension/anchorage point?
- 4 **OBSTRUCTIONS**
Are there restrictions on height, width, or access?
- 5 **ENVIRONMENT**
Is the equipment being used indoors, outdoors, near water, etc.?
- 6 **POWER SOURCE**
Do you need manual, electric, air, or hydraulic-powered equipment?
- 7 **ACCESSORIES**
Are shackles, slings or beams required as part of the lift?

CASE STUDIES

BEAM TEST

A metal fabrication company required a beam test for the installation of a bespoke 10 tonne staircase in a London Museum.

Alliance carried out a site survey and conducted a load test and proof test on the beam after the install.

Our lifting engineers also worked with leading equipment manufacturers on the technical configuration of the install.

LIFTING EQUIPMENT HIRE

Alliance is here to help whether you need a Material Lift to lift ductwork or a Gantry for a heavier, more complex lift.

We are always on hand to provide technical advice, just hear what our customers have to say...

“ David is always on hand to address our most challenging hire needs, and goes above and beyond to find the right equipment for the job – so it is completed quickly, safely and cost effectively. ”

CASE STUDIES

LIFTING EQUIPMENT TEST, INSPECT & MANAGEMENT

A large demolition contractor required an examination and logging system to maintain their lifting equipment.

Alliance's engineers introduced a colour coded tagging system to identify site locations and re-test dates.

We also created an equipment log to help site APs manage re-test dates, ensuring that equipment remains LEEA-compliant.
