## SERVING THE CONSTRUCTION INDUSTRY PROUDLY SINCE 2011.

Alliance Tool Hire Limited is an independent tool hire company with depots across the South of England. We offer a complete range of tool, survey, and lifting equipment for hire to the construction industry.

We were founded in 2011 by old friends and former colleagues Maggie and Dave Jones and Mark Rousell as London Tool Hire and South Coast Tool Hire respectively, backed by the team who built Brandon Tool Hire from eight to 140 locations.

After 10 years of successful growth,

the two businesses were combined to form Alliance Tool Hire in 2020 to allow us to service customers across the South of England.

In the last few years we have opened a new branch at Gatwick and acquired three businesses to strengthen our network further. We have exciting plans to build on this in 2025 and beyond.

Despite our growth, we remain founder-run and retain the atmosphere of a family business. Quite literally – our team comprises two father-and-son duos and one married couple.

As ever, our core focus is to provide excellent service that is tailored to each customer's requirements.

We always go the extra mile and do not shy away from unusual requests, as per our motto: "Of course!"

# HOW WE WORK

## EXPERTS IN EVERY BRANCH

Our managers are tool hire experts with decades of experience under their belts. If you have a tricky issue on site they will work with you to solve it.

Each depot has at least one dedicated mechanic on site, meaning your kit will be serviced and ready for hire at any location.

Our LEEA qualified engineers certificate (ROTE) all our own lifting equipment, and we can also service yours if required.

## PREMIUM BRANDS ONLY

Our depots hold an extensive range of tool, survey and lifting equipment comprising only premium brands.

Our stock levels are monitored using real time dashboards to ensure we always have availability.

## TRANSPORT FROM ALL LOCATIONS

Benefit from same or next-day delivery, clear communication, and our delivery tracking service. Once your order is placed, we take care of the rest.

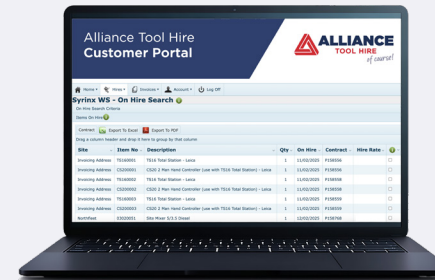

# MAKING YOUR LIFE EASIER

## Hire portal

Access your live hires and invoices 24/7.

Set access permissions for your team.

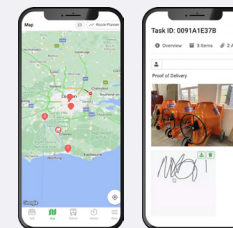

## On hire reports

Receive on hire reports to your inbox at times that suit you.

## Delivery tracking

Paperless PODs and POCs, condition photos and accurate ETAs.

## HEALTH AND SAFETY

### HOW WE KEEP YOU SAFE

One of the main benefits of hiring tools is knowing that all the correct safety precautions are in place.

Not only do we make sure that you have access to the best-of-the-best equipment our industry has to offer, but our accreditations from the Hire Association of Europe (HAE) and the Fleet Operator Recognition Scheme (FORS) cement our commitment to your safety, giving you peace of mind on site.

### QUALIFIED STAFF

All of our depot managers have decades of experience in the hire industry and they know our equipment inside out. Every depot is staffed by at least one dedicated mechanic, meaning that equipment is tested and serviced on site.

Additionally, we have several LEEA qualified lifting engineers who allow us to offer a high quality lifting equipment hire service, alongside testing and certifying your equipment if required.

### USER GUIDANCE

Our staff are always available to provide user advice, and offer demonstrations if required.

We also provide user guides with all our equipment. Personal protective equipment (PPE) is critical to the safe use of our hire fleet – we stock a full range across our network from high quality brand Ox.

## HEALTH AND SAFETY

### VEHICLES

We are recognised by the Fleet Operator Recognition Scheme (Bronze) for achieving best practice in safety, efficiency, and environmental protection in management of our vehicle fleet. All of our drivers complete daily vehicle checks to ensure that their vehicles are roadworthy.

### HEALTH & SAFETY AUDITS

We have gone one step further than standard HAE membership. We hold the HAE's SafeHire certification which requires rigorous audits to confirm that we follow safe systems of work.

We use a third party H&S consultant for unbiased auditing of our systems and procedures, in addition to regular internal audits.

Finally, we maintain a digital near-miss reporting system which allows us to proactively address risks.

# ALLIANCE HIRE FLEET

## Tool, Survey & Lifting Hire

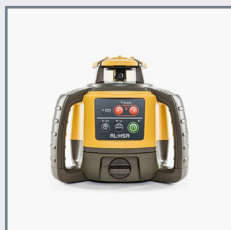

### TOOLS

Our depots hold an extensive range of high-quality tools sourced from only premium brands to ensure the best performance and reliability on every project.

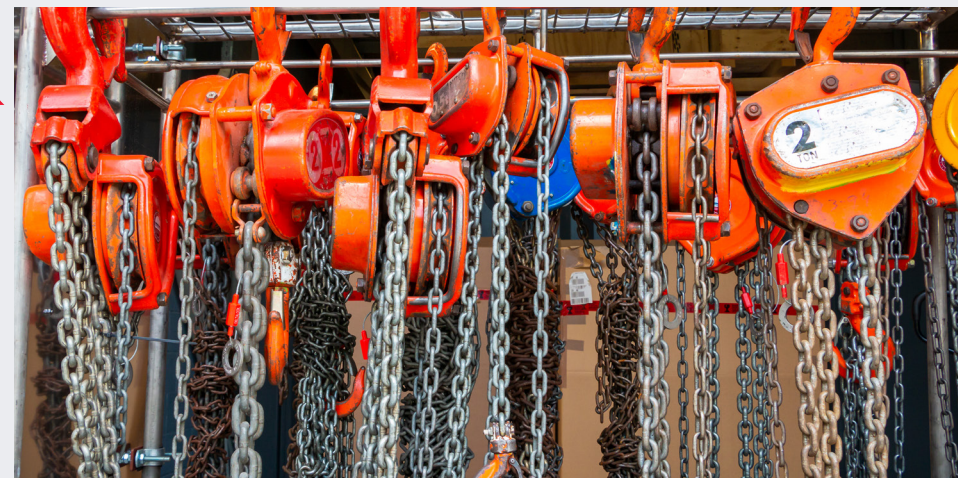

### SURVEY

We stock a wide variety of precision survey and location equipment, from laser levels and CATs & Gennys to damp meters.

### LIFTING

Our lifting equipment includes material lifts, gantries, chain hoists and more. Maintained by our in-house engineers.

### LIFT TESTING & REPAIR

#### OUR LIFTING SERVICES

- Inspection: 6 or 12 monthly inspection and certification of your equipment
- Testing: Mechanical and beam testing
- Management: Inventory management of your equipment
- Repairs: Repairs to your lifting equipment

#### OUR ENGINEERS

Our team of LEEA qualified lifting engineers are available to test and repair your equipment, either at an Alliance depot or on your site.

### Stair Tower

Specifically designed to be constructed on a flight of stairs to provide easier access, the Stair Access Tower basic pack provides a platform level of 2.2m from the lowest step. This can be extended up to working heights of over 11m.

#### KEY FEATURES

- Easy access from both sides of the stairwell unit.
- Platform level of 2.2m from the lowest step.
- This can be extended up to working heights over 11m.
- The portal frame design solves the common access problems experienced on narrow staircases.

|                 |              |
|-----------------|--------------|
| Width           | 700mm        |
| Platform height | 2.2m - 9.6m  |
| Working height  | 4.2m - 11.6m |

### Acrow Prop

We offer a comprehensive selection of heavy-duty Acrow Props, Steel Props, and Wall Props for hire. These props are widely used in the construction industry to provide temporary support for ceilings and walls during structural works.

#### KEY FEATURES

- Designed for temporary support in construction and renovation.
- Adjustable height range for versatility.
- Commonly used by builders and construction professionals.
- Range of sizes from 1.11m - 4.86m.

| Size 0        | Size 1        | Size 2        | Size 3        | Size 4        |
|---------------|---------------|---------------|---------------|---------------|
| 1.04m - 1.83m | 1.75m - 3.12m | 1.98m - 3.35m | 2.59m - 3.96m | 3.20m - 4.88m |

**UTS**

### One Man Tower

The One Man Tower is a mobile access tower designed for individual use, offering a safe, efficient, and quick assembly pathway to reach elevated workspaces. It's highly favoured in maintenance, installation, and construction industries for its ease of operation and enhanced safety features.

#### KEY FEATURES

- Single user operation: Designed for easy assembly and operation by one person.
- Equipped with wheels for easy repositioning on site.
- Built to adhere to strict safety standards, ensuring user safety.
- Suitable for a range of indoor and outdoor tasks.

|                 |                           |
|-----------------|---------------------------|
| Platform height | 1.1m, 2.1m, 3.1m and 4.1m |
| Platform length | 1.3m                      |

## BREAKERS & DRILLS

We have an extensive and reliable range of high quality breakers and drills for all your demolition needs, sourced primarily from Hilti. Whether you're looking to break up roads, pavements, slabs or wall tiles, our range of equipment is ideal for any drilling situation.

Breakers

Combi Hammers

Drills

Magnetic Drills

HILTI

NURON

### Hilti Nuron Cordless Medium Breaker TE500-22

With Active Vibration Reduction, ideal for chiselling concrete or masonry. Perfect for removing tiles, plaster, compacted earth, and demolishing concrete or stone walls. The Nuron TE 500-22 offers the power of the TE 500 AVR, with the added flexibility of cordless use anywhere, without relying on a power supply.

#### KEY FEATURES

- Nuron batteries deliver power and free you from power supplies.
- Matches the performance of corded demolition hammers.
- AVR reduces vibration
- Longer-lasting batteries, high-performance chisels, and productivity-boosting services.

TE-Y (SDS-max)

HILTI

### Hilti DD150 Diamond Drill + Stand

The Hilti DD150 Diamond Drill is designed for both handheld and rig-based coring with diameters between 8-162 mm. With an advanced three-speed gear system and an intuitive real-time display, it enhances your drilling experience.

#### KEY FEATURES

- Three-speed gear system ensures ideal drilling speed.
- 360-degree adjustable side handle that integrates water and dust management.
- Features a digital spirit level, gear selector, power control, usage stats, and user-centric messages.

Diameter range

8 - 162 mm

Base material

Concrete, asphalt, masonry

Dimensions

516 x 129 x 159 mm

### Magnetic Drill Low Profile

Compact, low-profile for precision drilling in tight spaces. Offers high accuracy for efficient on-site work. Includes a heavy-duty case, safety belt, guard, coolant hose, and keyless chuck (1-13mm) for quick bit changes.

#### KEY FEATURES

- Cutting depth of 25mm.
- Automatic cooling through the spindle.
- This horizontal metal core drilling machine is developed for the pokiest spaces.
- Gear ratchet lever switchable from right to left hand operation.

Input

900 W

1-speed gearbox

450 rpm

Height

227mm / 185mm

### Hilti M-Class Dust Extraction Unit VC 40, 110V

Introducing the Hilti M-Class Dust Extraction Unit, VC 40, 110V – the ultimate wet/dry industrial vacuum cleaner designed for the toughest construction work. This powerful and reliable vacuum is a must-have for any jobsite where dust extraction and cleaning are crucial.

#### KEY FEATURES

- Dust extraction from grinding, cutting, slitting, drilling and dry coring tools.
- Wet and dry cleaning.
- Removing slurry during wet coring applications.
- The Hilti M-Class Dust Extraction Unit is equipped with a sturdy construction and an integrated push-bar for easy mobility over longer distances.

|                    |        |
|--------------------|--------|
| Water capacity     | 22.8 l |
| Container capacity | 30 l   |
| Dust class         | M      |

### Triple Motor Industrial Vacuum Cleaner – SPE 380

The Triple Motor H/D Vacuum, with three collector motors, is built for heavy dust volumes in demanding settings. It includes Class H filters and an automatic cleaning system for sustained operation and easy dust disposal with LONGOPAC®.

#### KEY FEATURES

- Triple collector motors for high dust volumes.
- Class H filtration, 99.995% efficiency for particles as small as 0.3 Qm.
- Automatic filter cleaning for constant performance.
- Continuous operation capability, suitable for machine connections.

### Air Cube 2000 H-Class Dust Extractor

The H-Class DC AirCube 2000 is a high-capacity air cleaner designed to significantly reduce hazardous airborne dust, making it an essential tool for construction sites. It efficiently purifies the air from health hazardous substances like silica or wood dust. The device is equipped with a HEPA H13 filter and an easy-to-service cartridge air filter.

#### KEY FEATURES

- Minimises hazardous airborne dust, suitable for various professional environments.
- Variable speed transmission for energy saving.
- High-efficiency ECO-fan with reduced energy consumption.
- Washable stainless steel filter housing for durability.

|                |                                          |

### Backpack Poker

The Backpack Petrol Vibrating Poker is a lightweight portable unit that provides an easy solution for vibrating your concrete. With its four-stroke Honda engine there's no need for poker shafts or electric cables to drag through the concrete behind the operator.

#### KEY FEATURES

- Honda GX35 petrol engine.
- Swivel mounted, isolated frame.
- Flexible shaft with eccentric head.
- Centrifugal clutch.
- Quick-release shaft.
- Ergonomic backpack for comfort and control.
- Easy to carry and transport around the jobsite.

|                  |        |

### Diamond Floor Grinder

A versatile heavy duty floor grinder with 230mm diamond plates and flexible drive coupling. The design is simple and the machine is easy to set up, use and maintain. The machine includes a dust extraction hood and rubber skirt for dust free grinding.

#### KEY FEATURES

- Versatile heavy duty diamond floor grinder.
- Dust extraction hood.
- Range of diamond segments & grits.
- Compact & easy to use machine.
- Leaves smooth & level finish.
- For use in industrial & epoxy flooring.

|                             |             |
|-----------------------------|-------------|
| <b>Beam length</b>          | 1.9m - 6m   |
| <b>Max compaction depth</b> | 75mm        |
| <b>Engine power</b>         | 1.3hp/1.0kW |

### Easy Screed

A high performance free-screeding machine, ultimately designed for levelling and vibrating concrete slabs without the need to run off supporting form work. The drive unit provides control and high power vibration to a reinforced aluminium beam. The tool free removal and reversing of the uniquely shaped beam also allows striking off across traditional form work.

#### KEY FEATURES

- Quick clamp-on 4-stroke petrol power unit.
- Unique beam section allows "free screeding".
- Straight drive shaft for the highest reliability.
- Variable centrifugal force to suit beam width.
- Adjustable handle height for operator comfort.
- Structurally engineered, extruded aluminium beams.
- 8 different beam lengths to suit your applications.

### Hilti Nuron Disc Cutter DSH 600-22

The Hilti Cordless Cut-Off Saw DSH 600-22, energised by the Nuron battery system, offers the power of a 60cc petrol saw without the emissions or noise, and is suitable for various materials including concrete, steel, and masonry.

#### KEY FEATURES

- Lightweight at 8.9kg (12.2kg with accessories) for prolonged usage.
- Versatile on concrete, brick, masonry, asphalt, steel, and mineral.
- Complies with IEC battery operation standards.
- Suitable for indoor and outdoor use, with an SR DRS dust removal system.

|               |                  |
|---------------|------------------|
| Motor         | 63.3 cm cylinder |

### Petrol Masonry Bench Saw - 450mm (18in)

The Petrol Masonry Bench Saw - 450mm (18in) is renowned for its durability and performance. Designed for precision cutting of small to medium masonry materials, including concrete products, natural stone, and roof tiles, it offers both fixed and step cutting options with winding handle and foot pedal depth control. Its stay-level blade guard enhances safety, while a recirculating water pump or mains connection allows for wet or dry cutting.

#### KEY FEATURES

- Conveyor cart with anti-slipping surface.
- Easy access to water pump.
- Double lifting rails.
- Blade adjustment with crank.

|               |                 |

### Composite Road Plate

Composite road plates are a lightweight, modular alternative to steel, requiring no heavy lifting equipment and installing in minutes. Secure locking connectors, flexible rubber edges, and an anti-skid, high-visibility surface enhance safety, stability, and noise reduction. UK-made to the highest standards, they ensure durability and reliability.

#### KEY FEATURES

- Lightweight & easy install.
- Modular Fit - Customisable for trench safety.
- Secure Locking - Prevents movement with heavy-duty connectors.
- Anti-Skid & Visible.
- UK-made to top safety standards.

### Acoustic Noise Barrier

These barriers are expertly engineered to reduce site noise by up to 30 decibels. Crafted from water and fireproof PVC and foam, they absorb and minimise noise effectively. They are lightweight, roll-up, and easy to install and store.

#### KEY FEATURES

- Exceptional noise reduction.
- Versatile application for different settings.
- Easy installation, storage, and transportation.
- Enhanced visibility with reflective strips.
- Compliance with BS EN 60529 standards.

|                        |                                               |
|------------------------|-----------------------------------------------|
| <b>Noise Reduction</b> | Up to 30 decibels                             |

| <b>Application</b>     | Attachable to any site fencing or scaffolding |

### Track Mat

50 Tonne Ground Protection Mats. Engineered to distribute weight, these mats safeguard soft or vulnerable ground, ensuring seamless operations without damaging the terrain.

#### KEY FEATURES

- Built to support over 50 tonnes, making them suitable for a variety of heavy machinery and vehicles.
- Each mat is 2.4m long & 1.2m wide, connectable to create customised access roadways and pads tailored to specific project needs.
- Ideal for construction sites and outdoor events.

|                               |                       |
|-------------------------------|-----------------------|
| <b>Size</b>                   | 2.4 m x 1.2 m x 15 mm |
| <b>Maximum weight loading</b> | 50+ tonnes            |
| <b>Weight</b>                 | 44 kg per mat         |

## FIXING & FASTENING

We stock the best fixing and fastening equipment to make your job quicker and safer, from brands like Hilti and Makita. We have everything including brad nailers, impact wrenches, cartridge guns, screw guns and portnailers.

**Impact Wrenches**

**Screwdrivers**

**Nail Guns**

**Paslode**

### 2nd Fix Paslode Nail Gun

Introducing the 2nd Fix Gas Powered Brad Nailer from Alliance Tool Hire, an essential tool for carpenters and joiners working on new build and renovation projects. Powered by a combination of battery and gas, this tool ensures consistent, high-quality performance in various applications.

#### KEY FEATURES

- Ideal for securing architraves, skirting boards, panelling, door stops, stair rails, window casings, dado rails, and beadings.
- Battery and gas-powered.
- Consistent, high-quality performance.
- Wide range of brad sizes from 16mm to 63mm.

|                    |                   |
|--------------------|-------------------|
| Fixings per minute | 180               |
| Fixings per hour   | 10,800            |
| Battery charge     | 90min charge time |

**HILTI**

### Hilti Cartridge Gun DX 6

The fully automatic Hilti Fastening Tool features a nail magazine for quick fastening, one-step energy adjustment, and integrates with the Hilti Connect app. This tool simplifies tasks with rapid fastening, higher productivity, and versatile applications.

#### KEY FEATURES

- Rapid fastening: Nail magazine for fastening 10 collated nails before reloading.
- One-step energy level setting: Use a single cartridge colour for multiple fastenings, saving time.
- Higher productivity: Automatic piston return and cartridge advancement for up to 5 times faster work.

|                       |                         |
|-----------------------|-------------------------|
| Dimensions (LxWxH)    | 475 x 69 x 190 mm       |
| Fastener length range | 13 - 72 mm              |
| Fastener intake       | Single shot or magazine |

**PORTA NAILS**

### Portanailer

The Porta-Nailer from Alliance Tool Hire revolutionises flooring installation with unmatched accuracy and speed. Outperforming traditional hand methods, this tool ensures perfect nail placement with its exclusive "ratcheting ram" mechanism.

#### KEY FEATURES

- 100% accuracy and 60% faster than hand nailing.
- Ratcheting ram: Ensures proper nail seating, suitable for tight spaces.
- Wide head nails: Superior impact and holding power.
- Extensive coverage: 1000 nails cover around 19m<sup>2</sup> of standard 64mm strip flooring.

|          |                                          |
|----------|------------------------------------------|

### Indirect Oil Space Heater

The Indirect Diesel Oil Space/Jet Heater is specifically engineered for large indoor and outdoor areas, making it suitable for commercial and industrial venues. It assures reliable warmth during cold periods and is widely used in various trades and locations, including construction sites, schools and homes.

#### KEY FEATURES

- Suited for large spaces like warehouses or event venues.
- Economical heating method. Compact frame with integrated wheels for easy movement.
- Equipped with a cut-off feature for secure operation.
- Highly efficient and provides 100% clean, dry and fume free air.

|                  |                       |
|------------------|-----------------------|
| Heating capacity | 116,000 - 768,000 BTU |
| Recommended area | Up to 300sqm          |
| Fuel type        | Diesel Oil            |

**MASTER**

### Evaporative Cooler

Cost-effective and energy-efficient solution for cooling indoor and outdoor spaces. This unit works by evaporating water to produce a cool and refreshing breeze, making it perfect for use in hot and dry environments.

#### KEY FEATURES

- Powerful cooling capacity, making it ideal for use in indoor and outdoor spaces up to 30 square meters.
- The unit has an adjustable fan speed, which allows you to set the airflow to your preferred level.
- The cooler features an easy-to-use control panel, which makes it simple to adjust the settings.

|                       |                        |
|-----------------------|------------------------|
| Cooling capacity      | 200W                   |
| Recommended room size | Up to 30 square meters |
| Water tank capacity   | 23 L                   |

**EIP**  
INDUSTRIAL

### Medium Dehumidifier

This Medium Dehumidifier offers efficient moisture removal. Suitable for diverse scenarios like new construction, renovations, or floods, it promises swift and effective drying.

#### KEY FEATURES

- Achieves rapid drying, reducing usual times.
- Removes up to 20 litres in a day during high dampness.
- Made from tough welded steel.
- Perfect for new builds, renovations, and flood scenarios.
- Works well even in colder temperatures.
- Designed for easy movement and storage.

|                  |                   |
|------------------|-------------------|
| Extraction       | 12 litres per day |
| Effective volume | 100 m3            |
| Voltage          | 110/230           |

### Petrol Leaf Blower

Hire the Leaf Blower from Alliance Tool Hire. Designed for both homeowners and professionals, this tool simplifies outdoor cleaning tasks through its dual-blowing and vacuuming functions.

#### KEY FEATURES

- Ensures comfortable and easy handling.
- Combines power, efficiency, and user-friendly design, ideal for homeowners and professionals.
- Features ErgoStart technology for easy operation, reducing strain.
- Advanced engine technology cuts down emissions while maintaining performances.

|             |           |
|-------------|-----------|
| CO2         | 955 G/KWH |
| Performance | 0.7 KW    |
| Tank volume | 0.54 L    |

### Stump Grinder Petrol

Stump Grinder from Alliance Tool Hire: Ideal for efficient stump removal in various settings.

#### KEY FEATURES

- Versatile power: Dosko series, including the 200 mini and 337 maxi, suitable for different stump sizes in both tight and open spaces.
- Easy maintenance with easy-to-turn cutting teeth.
- 13hp 337 maxi with a three-grooved power band belt.
- 6hp 200 mini with foldable handles.
- Unique side discharge design for a clear view.

LINE Equipment

### Rechargeable LED Beacon Light

The Beacon 360 from Alliance Tool Hire offers versatile and powerful lighting for various scenarios, with three different modes emitting 360 degrees of bright light.

#### KEY FEATURES

- High power mode with 6,000 lumens for 4 hours, low power with 3,000 lumens for 8 hours, and power saver with 900 lumens for 25 hours.
- 4-hour charging time with the ability to operate while charging.
- Adjustable tripod, magnet mount, floor stand, or lifting eye for diverse placement options.

|               |            |
|---------------|------------|
| Voltage       | 240 V      |
| Lighting head | 360-degree |
| Wattage       | 45 Kw      |

### Eco Tower Light - Diesel

The Alliance Tool Hire Diesel LED Lighting Tower is a powerful and efficient solution for providing bright lighting in outdoor and indoor settings. Its portable design makes it easy to move from one location to another, providing light exactly where needed.

#### KEY FEATURES

- A powerful lighting solution, providing bright and even illumination across a large area.
- A massive saving in fuel costs, using only 0.5 litres of diesel an hour. This equates to a saving of up to 85% against conventional light towers!
- The lamps can be easily adjusted from ground level with a single person, while the fully hydraulic mast can be operated simply by pushing a button.

|                  |                |
|------------------|----------------|
| Fuel consumption | 0.5 litre/hour |
| Total runtime    | 170 hours      |
| Overall height   | 8850 mm        |

EXIN LIGHT

### Rechargeable LED Work Light

The Alliance Tool Hire LED Rechargeable Work Light offers exceptional performance, durability, and brightness, suitable for various challenging work environments.

#### KEY FEATURES

- Provides up to 30 hours of light on a full charge with a maximum output of 3200 lumens.
- Waterproof and self-contained, ideal for construction, rail, utilities, and emergency services.
- Multiple light settings for tailored illumination and extended battery life.
- Built to endure harsh conditions, reliable for professional use.
- Compact and easy to transport, suitable for both indoor and outdoor use.

armorgard

### Armorgard Cutting Station

The Armorgard Cutting Station is the ultimate solution for safe and efficient metal cutting on site. Designed with both functionality and security, this cutting station is a must-have for any construction, engineering or metalworking project.

#### KEY FEATURES

- High-quality steel construction with a durable powder-coated finish.
- Sturdy work surface suitable for cutting metal sheets up to 3m long and 8mm thick.
- Secure lockable cabinets for storing valuable tools and equipment.
- Integrated 110v power supply.
- Rubber mat to help reduce noise and vibration during cutting.

|                 |                                                   |
|-----------------|---------------------------------------------------|
| Weight          | 200 kg                                            |
| Noise reduction | Sound-deadening foam reduces noise by 20 decibels |
| Dimensions      | 1360mm x 770mm x 1905mm                           |

### Pipe Freezer 110V

The Pipe Freezer 110V, available for hire at Alliance Tool Hire, is the first Rothenberger unit designed to operate with the environmentally friendly refrigerant R290. Freeze heating and water pipes in a cost-effective, eco-friendly, and future-proof manner.

#### KEY FEATURES

- Future-proof: Switch to the eco-friendly refrigerant R290.
- Safe freezing: Support using an app during the freezing process working in confined spaces; it is possible through flexible refrigerant hoses.

|                                   |              |
|-----------------------------------|--------------|
| Voltage                           | 110V or 240V |
| Working Area Diameter Copper Pipe | 10 - 54 mm   |
| Working Area Diameter Steel Pipe  | 3 - 51 mm    |

### Arc Welder

With a welding power of 130 amps, this welder is well-equipped to handle a wide range of welding projects. The Arc Welder offers a welding range from 2mm to 5mm, providing the flexibility to work with different steel thicknesses.

#### KEY FEATURES

- Offers a welding power of 130 amps, providing ample power for welding steel.
- Capable of welding steel from 2mm to 5mm, accommodating various thicknesses.
- Designed for reliable and efficient operation, ensuring consistent and high-quality welds.

|               |          |
|---------------|----------|
| Voltage       | 110 V    |

### Two Tool Diesel Air Compressor

The Two-Tool Diesel Air Compressor from Alliance Tool Hire is designed for optimal efficiency and reliability in building sites and road work environments, capable of powering two pneumatic tools at once.

#### KEY FEATURES

- High performance: Provides 3.5m<sup>3</sup>/min volume flow and max 7 bar pressure for efficient pneumatic tool operation.
- Diesel engine: Equipped with a 26.5 kW diesel engine for sustained performance.
- Compact and portable: Measures 1.94m (L) x 1.16m (W) x 1.05m (H) and weighs 649kg, facilitating easy transportation.

|               |                         |
|---------------|-------------------------|
| Volume flow   | 3.5 m <sup>3</sup> /min |
| Max. pressure | 7 bar                   |
| Weight        | 649 kg                  |

### Petrol Generator

Meet your power requirements with high-quality Petrol Generators available for hire from Alliance Tool Hire. These generators are designed to withstand the demands of construction sites, ensuring a dependable and consistent power supply for various applications.

#### KEY FEATURES

- Lightweight design for easy transportation and convenience on-the-go.
- Rugged and durable.
- Honda GX range engines.
- Designed with a heavy-duty alternator and rugged metal control box for long-lasting performance.
- Construction-ready: Ideal for powering a range of handheld power tools, ensuring you're equipped for any task.

|         |                                                                        |

| Weight  | 41kg   42kg   59kg   71kg                                              |

### Diesel Generator

Ensure your project stays powered with Diesel Generators available for hire from Alliance Tool Hire. These generators are designed with versatility, delivering efficient power in various capacities while maintaining quiet operation. Complete with close fitting acoustic canopies and long run fuel tanks. Providing super silent, highly portable and versatile power for demanding applications in all construction sectors.

#### KEY FEATURES

- Super silent: Acoustic canopies ensure quiet operation, minimising noise pollution.
- Designed to withstand demanding working environments, offering consistent power output.
- Easy to transport, ensuring that you have a reliable power source wherever it is needed.
- Long-run fuel tanks: Enables continuous operation, reducing the need for frequent refuelling.

## PUMPS

### FLOOD RECOVERY: CHOOSING THE RIGHT PUMP

The most challenging aspect of flood recovery is water extraction. We offer a variety of pumps suited for different conditions, helping you efficiently dry out construction sites or waterlogged footings.

**Submersible Water Pump:** Ideal in clean and on construction site water applications that contain sand and silt in suspension like riverbanks overflows or trenches. Available in 50mm and 75mm diameters, these pumps handle abrasive materials and have an 11m head.

**Residual Pump:** Best for flood removal in clean-water areas like rooms or cellars. With 25mm & 50mm discharge, they pump down to 1mm and up to 11m deep at 170 L/min.

**Trash Pump:** Petrol/diesel-powered for dirty water with debris, lifting up to 8m and handling solids up to 25mm in diameter at 1300 L/min. Available in 50-75mm.

**Centrifugal Pump:** For clean water in areas with limited power. Petrol-powered, pumping up to 6m with a flow rate of 600 L/min, in 50-75mm.

| Head          | 11 m      |

### Residue Puddle Pump

Alliance Tool Hire presents the Residue Puddle Pump, a highly efficient tool for domestic water removal, ideal for handling water from leaks or minor floods.

#### KEY FEATURES

- Pumps water down to 1mm, perfect for thorough clearing in shallow areas.
- Designed for lasting reliability, widely used in rental, utility, and construction sectors.
- Features a double mechanical seal with oil lifter for optimal lubrication and wear-resistant components for site water use.
- Top discharge design creates a cooling channel, allowing extended operation in seepage conditions.
- Discharge position can be horizontal or vertical, adding flexibility and preventing hose kinking.

OBART  
OPENING SOLUTIONS

|              |                      |

| Flow         | 230 L/min - 310L/min |
| Free Passage | 6 mm, 7 mm           |

### Submersible Pump

Alliance Tool Hire offers robust and efficient Contractors' Pumps from the LB and HS series, ideal for use in challenging environments.

#### KEY FEATURES

- LB and HS series effectively manage water with sand and silt.
- Double mechanical seal and oil lifter ensure consistent operation.
- Constructed with rubber and urethane to reduce wear and clogging.
- LB-480 and LB-800 allow for horizontal or vertical discharge settings.

DryMax

|          |           |
|----------|-----------|
| Diameter | 75 mm     |
| Flow     | 330 L/min |

### Diaphragm / Sludge Pump - Diesel

Alliance Tool Hire offers an efficient Diaphragm Pump, perfect for handling tough materials like sand, mud, and sewage on construction sites.

#### KEY FEATURES

- Capable of pumping fluids with suspended solids up to 40mm, suitable for various site conditions.
- Designed with nitrile rubber diaphragms and check valves for indefinite dry running without priming.
- Constructed with an aluminium pump end, needle bearings, and oil-filled gear unit for durability.
- Features a pivoting pump chamber for easy use and storage.
- Includes a 5.4-litre fuel tank for up to 6 hours of continuous operation.

## SANDING & WOODWORKING

### Drywall Sander

The Festool Professional Long-Reach Sander elevates sanding tasks in dry, mortarless construction, making wall and ceiling sanding quick and effortless.

#### KEY FEATURES

- Powerful motor with direct drive for efficient force transmission and swift operations.
- Maintenance-free build ensures lasting, consistent performance.
- Efficient operation with a powerful motor and direct drive saves time and energy.
- Ergonomically designed for comfortable hand-held use, even for extended periods.
- Precision engineering for uniform, high-quality sanding results.

|              |               |
|--------------|---------------|
| Power rating | 590w          |
| Rated speed  | 900 - 1800rpm |
| Prep rate    | up to 50m/hr  |

### Floor Sander

Powered by a robust 1010W electric motor and featuring a wide 100mm sanding capacity, this tool is engineered for optimal efficiency and swift task completion, delivering professional-grade results every time.

#### KEY FEATURES

- Targets old wooden floorboards, block floors, and traditional parquet, offering a revamped, smooth surface.
- Equipped with a 200mm wide sanding drum for fast and effective operation.
- Designed for professionals, delivering power and precision with a balanced, feel-touch experience.
- Ideal for a wide array of surfaces, including decking, fibre board, and engineered floors.

|            |          |
|------------|----------|
| Voltage    | 240 V    |
| Power      | 1920 W   |

### Electric Mitre Saw 110V

State-of-the-art Mitre Saw, equipped with a laser for high-capacity applications. This saw is designed to meet the demands of construction sites and meticulous craftsmen, ensuring accuracy and smoothness in every cut.

#### KEY FEATURES

- Outfitted with a laser, this saw turns every cut into an artwork of precision, ensuring impeccable accuracy even in high-capacity applications.
- With a 1430W motor nested in a dual slide system, experience power without the bulk. Its compact design allows placement by a wall, making it a space-saver.

|                        |              |
|------------------------|--------------|

### Chemical Store

Secure storage with 3mm steel construction, easy-access gas struts, and a ventilation system to reduce fumes. It includes built-in spill containment, safety warning stickers, and an internal shelf. Finished with anti-corrosive paint, it complies with COSHH standards for safe chemical handling.

#### KEY FEATURES

- 3mm steel sheet construction for secure chemical storage.
- Easy access with twin gas struts and a built-in lid stay for smooth and safe lid operation.
- Ventilation system with hi + lo ventilation points to mitigate hazardous fumes.
- Built-in spillage containment and drain-off facility for effective spill management.

### Confined Space Escape Kit

Alliance Tool Hire offers an essential escape kit for confined spaces. It includes a gas detector, 15-minute breathing apparatus, full-body fall arrest harness, arrest block, man-riding winch, and tripod for safe personnel lowering. Available as a complete kit or individual items.

#### KEY FEATURES

- Gas detector monitors for hazardous gases.
- Breathing apparatus provides up to 15 minutes of breathable air.
- Full-body fall arrest harness for optimal safety.
- Fall arrest block serves as an arrest and retrieval system.
- Man riding winch for safely lowering personnel and materials.
- Man-riding tripod facilitates safe lowering in confined spaces.

|                            |                                                 |
|----------------------------|-------------------------------------------------|
| <b>Fall arrest harness</b> | Full body harness for fall arrest               |
| <b>Breathing apparatus</b> | Supplies 15 minutes of breathing air            |
| <b>Gas detector</b>        | Monitors atmosphere for dangerous levels of gas |

AIRDECK

### Airdeck Inflatable Soft Landing System

Alliance Tool Hire's AirDeck air bag enhances fall protection with its air-filled design, offering rapid deployment and easy handling. It serves as a fall arrest bag, soft landing cushion, and protective barrier.

#### KEY FEATURES

- Air-filled design for rapid deployment, maximum safety, and easy handling.
- Deflatable for easy transport and storage, unlike bulky alternatives.
- Reduces the risk of fall-related injuries in various applications.
- Ideal for construction, scaffolding, vehicle maintenance, and product transport.

|                         |                       |
|-------------------------|-----------------------|
| <b>Weight of airbag</b> | Approx 5kg            |
| <b>Dimensions</b>       | 750 x 750 x 2100      |
| <b>Coverage</b>         | Each bag covers 1.6m2 |

### Inspection Camera

The Inspection Camera from Alliance Tool Hire offers a new standard in efficient, accurate visual inspections, ideal for hard-to-reach areas with its advanced technology, user-friendly design, and robust build.

#### KEY FEATURES

- 3.5" colour LCD screen with four adjustable LEDs for clear images in dark environments.
- Compact, handheld design with a robust aluminium camera head, suitable for confined spaces.
- Features digital zoom and 4 90° image rotation for detailed, multi-angle inspections.

|             |                 |
|-------------|-----------------|
| Screen      | 3.5" Colour LCD |
| Camera Head | 17mm Diameter   |
| Battery     | 2.7V Li-Ion     |

### Self-Levelling Laser Level

Alliance Tool Hire offers a Self-Levelling Laser Level, ideal for precise measurements in various construction scenarios. Designed for rugged outdoor use, it's resilient and efficient, ensuring accuracy in challenging conditions.

#### KEY FEATURES

- Quick setup: User-friendly, ready in moments.
- Durability: Built to withstand tough environments with water, impact, and dust resistance.
- Slope matching: Suitable for grades on both flat and sloped surfaces.
- Pulse power technology: Reliable accuracy unaffected by sunlight and other light sources.

|                |           |
|----------------|-----------|
| Laser range    | 800mm     |
| Accuracy       | +/- 1.5mm |
| Rotation speed | 600 rpm   |

### Cable Avoidance Tool Cable Detector (C.A.T.)

Alliance Tool Hire offers the CAT Cable Locator, a user-friendly device for efficient underground cable and pipework detection, ideal for quick and accurate ground surveys.

#### KEY FEATURES

- Quick and easy underground cable and pipework location.
- Simple operation, minimal training required.
- LCD display with automatic backlight.
- Compatible with Cat Genny, Sonde, and Cobra Reel.
- Also known as a cable avoidance tool (CAT), Cat Scanner, Cat Scan, Cat & Genny.
- Associated trades: Civil engineers, Surveyors, Plumbers, Electricians.

|                               |     |
|-------------------------------|-----|
| Features Avoidance Mode™ (A)  | Yes |
| Genny™ Dual Signal Locate (G) | Yes |
| Power Signal Locate (P)       | Yes |

## LIFTING

Alliance Tool Hire provide a comprehensive range of lifting equipment to make your work easier and safer. Equipment includes material lifts, gantries, winches, chain hoists, pallet trucks, and more supplied by the likes of Genie, Mace, Loadsurfer, Tractel and Conquip.

**Material Hoists**

**Chain & Wire Cable Hoist**

**Bumpa Hoists**

**Gantry Systems**

**Genie.**

### Counter Balance Genie SLK25

The SLK-25, a manual material lift, has a 295 kg lifting capacity and max height of 7.32 metres. Electricians, HVAC technicians, and plumbers use it for lifting, positioning, and installing materials like ducts, fixtures, and pipes. Known for durability and multiple handling options, it's suited for various tasks and environments.

#### KEY FEATURES

- Lifting capacity: Up to 295 kg
- Max lift height: 7.32 m
- Popular with electricians, HVAC techs, and plumbers
- Assists in lifting and installing ducts, fixtures, and pipes
- Multiple load handling options for diverse tasks
- Durable and reliable across environments

|                     |       |
|---------------------|-------|
| Max. lifting height | 7.90m |
| Load capacity       | 295kg |
| Weight              | 200kg |

### Alloy Gantry

The PORTA-GANTRY is a lightweight, portable, and sturdy lifting system with capacities up to 5000 kg. Widely used in water, wastewater, and industrial sectors, it offers a versatile solution for lifting and moving heavy loads in confined spaces where standard equipment can't be utilised.

#### KEY FEATURES

- Easy to transport, assemble, and disassemble for use in varied locations.
- Adjustable height and span, catering to specific lifting requirements.
- Options available for loads up to 5000 kg.
- Built with robust materials for enduring performance.

|                          |                                                   |
|--------------------------|---------------------------------------------------|
| Load capacity            | Ranges from 500 to 5000 kg depending on the model |
| Material                 | Various lifting sizes & spaces                    |
| Adjustable height & span | 3.21m - 4.86m                                     |

### Battery Powered Vacuum Lifter 150kg

The Battery Powered Vacuum Lifter is a vacuum lifting device designed for handling and installing a wide range of construction materials. Predominantly used by construction and landscaping professionals, it ensures precise, safe, and efficient material placement.

#### KEY FEATURES

- Ideal for lifting concrete, stone, and other porous materials.
- Enhances operational safety by reducing manual handling.
- Accelerates installation processes with precise material placement.
- Ergonomic design: Minimises strain on workers, promoting comfort.

|              |                     |
|--------------|---------------------|
| Dimensions   | 440mm x 250mm       |
| Power source | 12V / 7.2Ah Battery |

## Our Partners: Hilti Group

**We often talk about how committed we are to providing equipment of the highest quality; nowhere is that more apparent than in our partnership with Hilti.**

**Well known in the construction industry as a professional's go-to tool company, Hilti products have formed a core part of our fleet from the very beginning, given their excellent reputation for performance and durability.**

*"At Hilti, we are constantly looking for ways to innovate and make jobsites more productive but not at the cost of health and safety. We look for partners to work with that have the exact same ethos as us, and Alliance Tool Hire are just that! We provide support for depots nationwide with dedicated account managers for each specific territory to help drive hire demand. Alliance has always recognised the quality and support that Hilti provides, which is why it works."*

**- Bobby Swinney, Hilti.**

## HILTI NURON RANGE

Whether you're in the building trade or taking on heavy-duty tasks with demolition hammers, Hilti Nuron ensures power and efficiency without the restrictions of a cord. Our team has hands-on experience with these tools, and they've shared their insights about the standout features that truly make the difference on a construction site.

**Single Platform Convenience:** The Nuron cordless platform powers over 70 tools that support breaking and cutting through to drilling and fastening, minimising the hassle of juggling between different power sources. A single battery platform is a real game-changer, meaning less downtime due to misplaced batteries or chargers.

**More Work-Per-Charge:** The Hilti Nuron range is setting a new standard for the power of battery-operated tools. Each device from this range gives you power on par with or even better than corded tools, increasing productivity on site.

**Safety First:** Safety is paramount, and with a reduction in Hand Arm Vibration (HAVS), the universal Dust Removal System (DRS) and the elimination of cords, Nuron prioritises the health and safety of your team.

**Connected Batteries:** Built-in battery diagnostics alert you to the battery's health via the colour of the built-in LED light. Batteries can be replaced free of charge whenever there is an issue, meaning no reduction in productivity for you.

## NURON PRODUCT RANGE

**Hilti Nuron Cordless Heavy Duty Demolition Breaker TE2000-AVR**

**Hilti Nuron Cordless Medium Breaker TE500-22**

**Hilti Nuron Cordless Reciprocating Saw SR6-22**

## SUSTAINABILITY

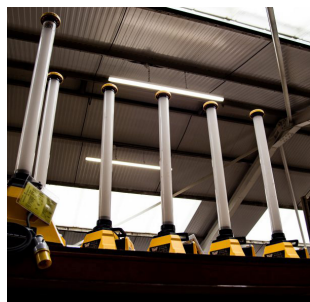

Here at Alliance Tool Hire, we are passionate advocates for the environment and are always seeking to operate in the most sustainable way. In line with the government's commitment to achieve zero net carbon by 2050, we are taking measures to reduce our carbon emissions and help our customers to do the same.

### CARBON NEUTRAL TODAY

We are committed to transitioning to lower impact operations, which is a multi-year process. In the meantime we will fully offset our emissions that cannot be completely avoided by making equal CO2 savings elsewhere.

We have done this through Certified Emission Reduction units, which are overseen by the United Nations and are the most recognised and widely used standard in the world.

These fund projects that reduce or avoid greenhouse gas emissions in areas like renewable energy and reforestation, while also supporting the UN's sustainable development goals.

### INDIRECT / SUPPLY CHAIN EMISSIONS

#### Supplier Alliances

We work with suppliers committed to sustainability and closely examine their environmental efforts. We're proud that one of our key partners, Hilti, achieved carbon neutrality in its own operations in 2023 and invests in circular practices like reusing and recycling equipment.

#### Reduce Our Hire Fleet's Emissions

We are always looking to offer lower-emissions alternatives in our hire fleet, which usually have additional benefits like improving air quality on site

### ALTERNATIVE POWER SOURCES

Lower-emissions fuels such as HVO, which can reduce carbon emissions by 90% compared to white diesel, are available across our depot network.
